DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to polynucleotides, classified in classes 435, subclass 69.1 and 536, subclass 23.5.
- II. Claims 6-8, drawn to fusion proteins, classified in class 424, subclass 178.
- III. Claims 9-23, drawn to assays, classified in class 435, subclass 7.1.

The inventions are distinct, each from the other because of the following reasons:

The polynucleotides of Invention I are not related to the fusion proteins of Invention II. They differ structurally and functionally, can not be used together or interchangeably, and have non-coextensive searches and considerations.

The polynucleotides of Invention I are not related to the assays of Invention III. They can not be used in or detected by these assays.

The immunogenic proteins of Invention II are not related to the assays of Invention III. They can not be used in or detected by these assays.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the different groups are not co-extensive, restriction for examination purposes as indicated is proper.
